

KARTHIK NADAR

+91 9372901773 — Mumbai, India ◇ karthiknadar1204@gmail.com — [LinkedIn](#) — [GitHub](#) — [Projects](#)

SKILLS

Technical Skills Next.js, React.js, Express.js, Drizzle ORM, Prisma ORM, Firebase, Tailwind CSS, Docker, Python, FastAPI, Redis, LangChain, Pinecone, ChromaDB, Cloudflare Workers, FFmpeg, MongoDB, PostgreSQL, TanStack, tRPC, vercel ai sdk, AWS

EXPERIENCE

RapidNode

June 2025 – August 2025

AI Intern

- Optimized AI workflows by implementing a bulk message processing system, reducing API calls from 1000 to just 50.
- Worked extensively with Python to streamline backend processes and enhance system performance.
- Built social graph features and developed interactive dashboards for data insights.

YesItaly

August 2025

Software Developer

- Built an internal CRM system to manage student applications and university workflows.
- Self-hosted mailcow, an email server on AWS and created a dashboard to read and summarise mails via IMAP.
- Implemented telecalling features using Smartflo's API for counsellor communication.

PROJECTS

PlumAi

(NextJS, Vercel AI SDK, OpenAI API)

An AI-powered search agent that redefines how we explore information online. Designed as a highly agentic Retrieval-Augmented Generation (RAG) system, PlumAi combines the Tavily LLM Search API and OpenAI API to deliver precise, context-aware search results tailored to your needs. ([Try it here](#))

Formify

(Gemini API, OpenAI API, OpenAI Embedding Model, DnD Kit, Recharts, NextJS)

An innovative AI-powered form builder that simplifies data collection and analysis. Built using NextJS, it harnesses the Gemini API to generate dynamic forms from text and the OpenAI API to enable chatting with responses for deeper insights. It also leverages OpenAI's tool invocation for graphical visualization through interactive charts. ([Try it here](#))

DataSshorts

(Grok, OpenAI Embedding Model, NextJS)

A groundbreaking AI-powered platform that lets users chat with their entire database using everyday language. Built using NextJS, this agentic tool is designed for seamless end-to-end data querying, insights generation, and dynamic visualization. Powered by the OpenAI API, it leverages LLMs and AI-driven retrieval to deliver instant answers, spot trends, and create stunning graphical insights with Recharts. ([Try it here](#))

ACHIEVEMENTS

- Finalist (Top 8) in the Bajaj Finserv Health Hackathon. Built a text-to-video pipeline using parallel processing to convert brochures into video ads. ([GitHub Repository](#))
- Secured 4th position in HackByte 3.0, Central India's largest hackathon held in Jabalpur. Built a fully agentic app that enables users to chat with their PostgreSQL databases in natural language. ([check it out](#))

FREELANCING EXPERIENCE

- Developed a comprehensive inventory management system for a factory, streamlining product tracking and order fulfillment. Built using NextJS: [Live Site](#).
- Built a full-fledged project for a Chartered Accountant, incorporating client management, document handling, and secure communication: [Live Site](#).
- Created a furniture showcase website that displays products effectively: [Live Site](#).
